

Swim Meet Manager SDIF Files

SDIF data files are an old format and as such only support Freestyle and Medley Relays.

To import entries for Fly, Back, Breast relays we need to trick Swim Meet Manager into thinking they are Freestyle relays.

EnterNOW will export the SDIF files with Fly, Back, Breast relays all marked as Freestyle.

In Swim Meet Manager you need to edit each event that is affected, and

1. Change the **Stroke** to **Freestyle**
2. Change the **Note**: to read Fly Relay (or whatever style it is supposed to be)
3. Tick the box that says **Suppress Stroke Name**

The screenshot shows the 'Event Edit' window for 'Girls Open 200 Fly Relay Relay'. The window is divided into several sections:

- Event #:** 25
- Individual / Relay:** Relay (selected)
- Gender:** Alt Gender (checked), Girls (selected)
- Division:** (empty)
- Age Group:** Open/Senior (selected)
- Distance:** 200 (selected)
- Stroke:** Freestyle (selected)
- Note:** Fly Relay
- Suppress Stroke Name:** (checked)
- Rounds:** Timed Finals (selected)
- Round 1 - Prelims or Timed Finals:** Number of Lanes (1-12): 8, Lanes for Best: 8, Heats: 1
- Assign Lanes:** Standard (selected)
- Heat Order:** Slow to Fast (selected)
- Event Type:** Standard (selected)
- Round 2 or Round 3 - Finals:** Number of Lanes (1-12): 8, Heats in Finals (1-6): 1
