Live Results

- [Public API]

Public API

There is a public api for liveresults if you wish to use the data in your own applications

Json API call

https://liveresults.co.nz/api/public/10/results/{competition_id}?date=YYYY-MM-DD&timestamp={timestamp}

Parameters

competition_id eg, 7e4439a4-6c67-40d0-b99f-d0940bb1c866 (we will supply the correct id, once the draw is finalised)

date = the date of all the races you want to retrieve must be YYYY-MM-DD

timestamp = current timestamp to stop the api from caching results, can be any format

These Dates will work with the above competition

- 2018-01-15
- 2018-01-16
- 2018-01-17
- 2018-01-18
- 2018-01-19
- 2018-01-20

NZ Waka Ama Sprint Nationals 2018

https://liveresults.co.nz/136

Example url

https://liveresults.co.nz/api/public/10/results/7e4439a4-6c67-40d0-b99f-d0940bb1c866?date=2018-01-15&timestamp=123456

Disqualification

If there is a disqualification, you will see data like this

```
"placing_numeric": null,"placing_text": "DQ",
```

If there is no disqualification then it will look like this

```
"placing_numeric": 2,"placing_text": null,
```

Medals

Medals are indicated using a numeric index

```
"medal": 2,
```

1 = Gold, 2 = Silver, 3 = Bronze

Race State

Each race can have a number of different states

```
"race_state": "RESULT",
```

RESULT	Race is finished with placings and times
SCRATCHED	Race was scratched, no results
PROGRESSION	Lanedraw for repechage, semi, final
LANEDRAW	Lanedraw for preliminary heats
PROTEST	Lanedraw is under protest, do not display the results

Errors

If you don't pass the correct parameters, you will get an error json

```
{"success":false,"data":null, "errors":["error message text"]}
```
