

# Live Results

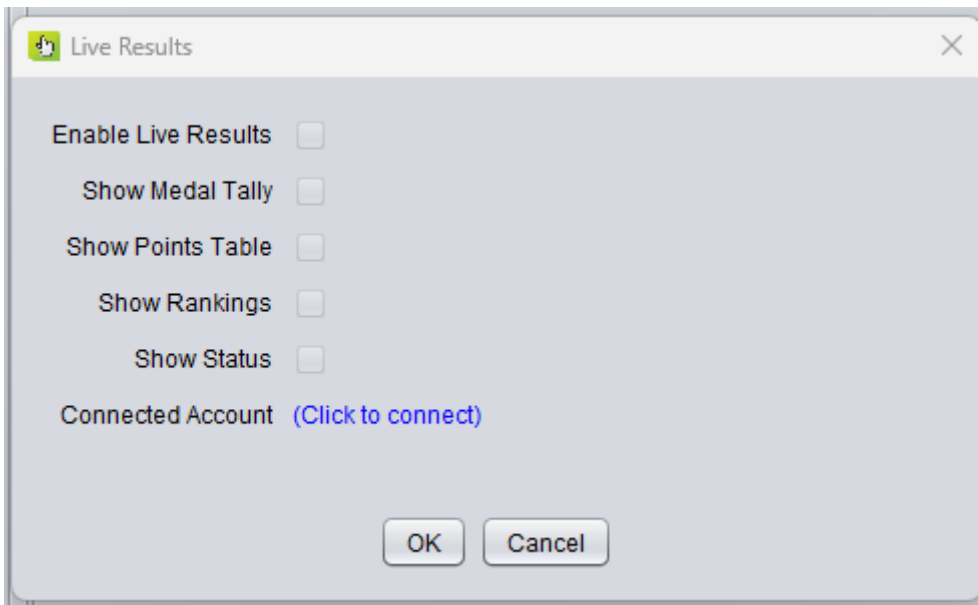

Live Results is a website you can use to publish your Race Manager results too.

## Step 1. Connect Your Account

Go to **Live-Results** > **Settings** in the menu

If you have already connected your account, you can go ahead to Step 2

Click on **(Click to connect)**

Contact [help@enternowonline.com](mailto:help@enternowonline.com) to get your **Live Results Key**

Note: Keep a note of that key, incase you need to set up Race Manager again in the future

Enter your Live Results Key, and press OK

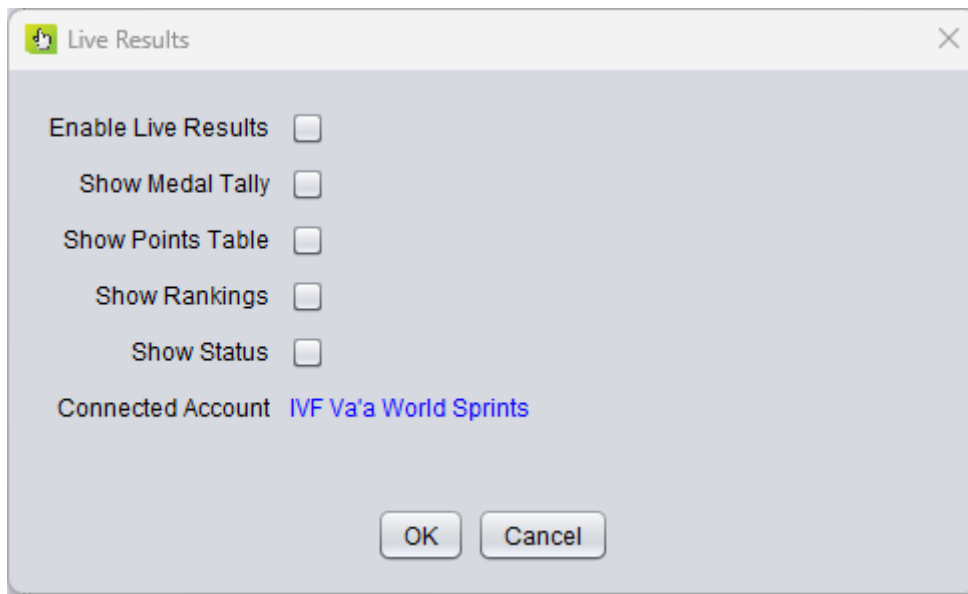

Connect to Live Results

Live Results Key:

OK Cancel

This dialog box is titled "Connect to Live Results". It features a question mark icon on the left. In the center, there is a text label "Live Results Key:" followed by a long, empty rectangular input field. At the bottom right, there are two buttons: "OK" and "Cancel".

Your account will be verified, and the name of your account displayed on the screen

Live Results

Enable Live Results ☐

Show Medal Tally ☐

Show Points Table ☐

Show Rankings ☐

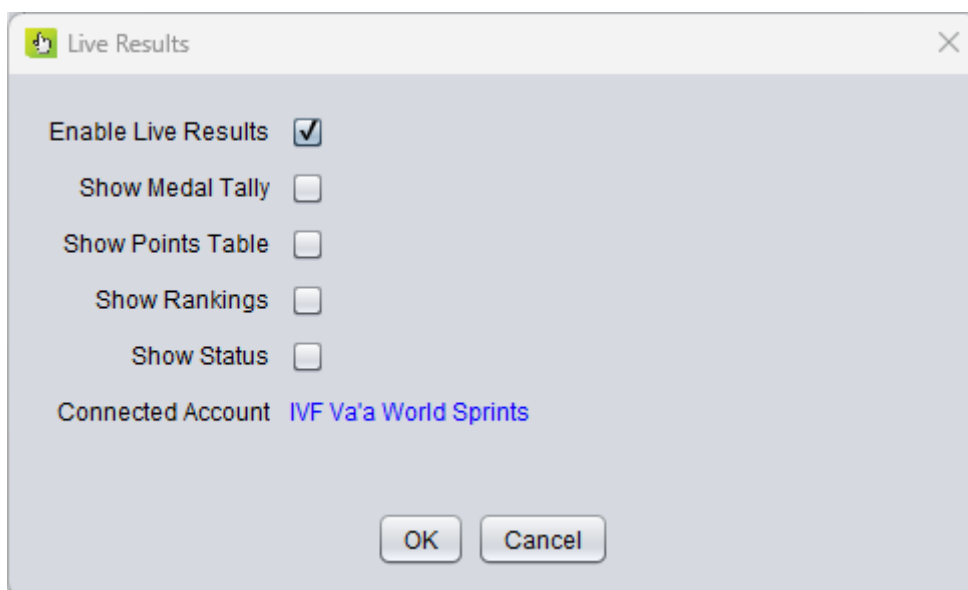

Show Status ☐

Connected Account [IVF Va'a World Sprints](#)

OK Cancel

This dialog box is titled "Live Results". It contains five settings, each with a checkbox: "Enable Live Results", "Show Medal Tally", "Show Points Table", "Show Rankings", and "Show Status". All checkboxes are currently unchecked. Below these settings, it says "Connected Account" followed by a blue hyperlink "IVF Va'a World Sprints". At the bottom, there are "OK" and "Cancel" buttons.

## Step 2. Enable Live Results

Live Results

Enable Live Results ☒

Show Medal Tally ☐

Show Points Table ☐

Show Rankings ☐

Show Status ☐

Connected Account [IVF Va'a World Sprints](#)

OK Cancel

This dialog box is identical to the previous one, but the "Enable Live Results" checkbox is now checked, indicated by a small black checkmark inside the box. The other settings and the "Connected Account" information remain the same.

Now tick **Enable Live Results**

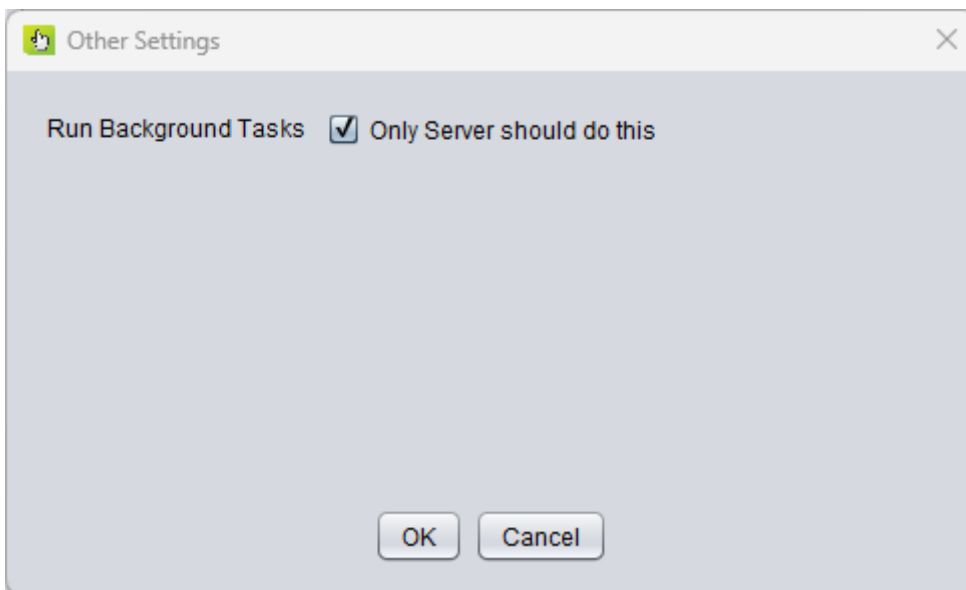

You can also choose from the other settings depending on your event

Show Medal Tally	Display medal tally page, if the progressions in racemanager you are using support medals
Show Points Table	Display a points table page, if the progressions in racemanager you are using support points
Show Rankings	Display ranking page, which orders the teams/competitors from fastest to slowest across each event
Show Status	Display a page, showing which event is next, which has just completed, and which event should go to boat loading

Once you have chosen the settings you need, click on [**OK**]

You will also need to set up one computer as the Race Manager server, only the server will send results to the live results website.

Go to **Settings > Other** in the menu

Tick the box that says **Run Background Tasks**, and click on [**OK**]

Important: If you have multiple computers connected to RaceManager for your event, only 1 computer should have the Run Background Tasks turned on, otherwise you will get unpredictable updates happening.

## Step 3. Publishing Live Results

To publish your race schedule / lane draw to the live results server,

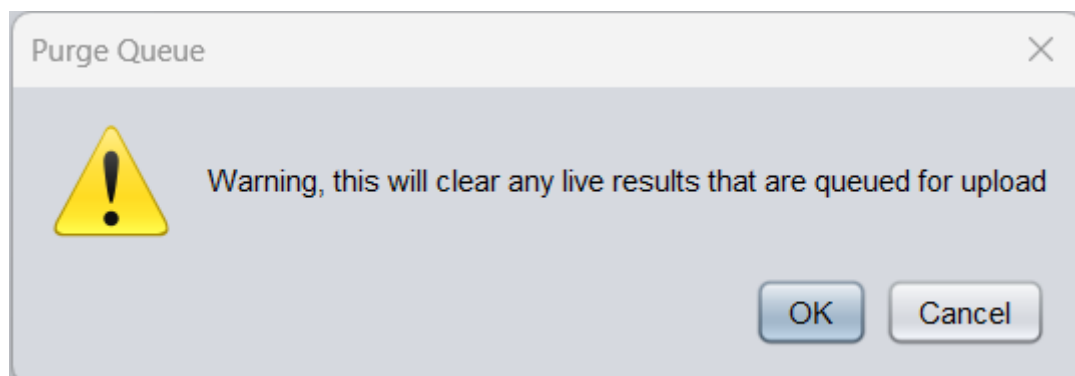

Go to **Live-Results** > **Upload all races** from the menu, this will send all your races to the Live Results site

This may take 1-2mins depending on the size of your event and the speed of your internet connection. If you go to [www.liveresults.co.nz](http://www.liveresults.co.nz) you should be able to see your event on in the list.

After you have done that, everytime you publish a race result, those changes will automatically get set to the Live Results website.

## Trouble shooting

If for any reason your results do not show up on [liveresults.co.nz](http://liveresults.co.nz), you can try **Live-Results** > **Purge Queue**, and then **Live-Results** > **Upload all races** again
